

# WOOD SPECIES

Every Captiva door begins with premium select grade lumber. We meticulously gather wood from around the globe to ensure that every door that we make is of the highest quality. We strive to purchase wood products made from lumber harvested in a sustainable manner. The boards and veneers that go into constructing each door are hand selected so that grain and color are consistent.

## INTERIOR AND EXTERIOR USE

### SAPELE AND UTILE MAHOGANY

Sapele and Utile are very similar to Honduras Mahogany with a regular striped pattern and a dark red-brown color. This species sands and finishes easily and smoothly. Sapele is used for Paint Grade doors and Utile is used for Stain Grade.

### SPANISH CEDAR

This hardwood varies from light to dark reddish brown. The texture is rather fine and uniform to coarse and uneven. Spanish Cedar is considered naturally decay resistant.

### FIR

This is a dimensionally stable wood with a straight grain, uniform in color, pattern and texture. Its light warm hue will become more red with age. Fir stains easily and smoothly.

### EASTERN WHITE PINE

This softwood is light brown in color, often with a reddish tinge and turns darker on exposure to air. Eastern White Pine features a comparatively uniform texture and is straight grained.

### WHITE OAK/QUARTER SAWN WHITE OAK

White Oak is primarily warm in color with a hint of ash. It's grain pattern varies from straight and tight to arched and dramatic. White Oak stains well for an excellent finish.

### RECLAIMED WOOD

Reclaimed wood is seasoned lumber that has been salvaged from abandoned barns, factories and industrial buildings. Some common types are: pine, elm, cherry, chestnut, walnut, hickory, maple, and quartersawn oak.

### SPECIAL SPECIES REQUESTS

When your project requires a specific species not listed above, let us call on our lumber suppliers from all over the globe to find it.

## INTERIOR USE ONLY

### POPLAR

This hardwood is light in color and may feature dramatic dark color variations. Poplar is mostly painted or used with dark stains.

### RED OAK

The texture of Red Oak features a very strong grain pattern which ranges from fine, straight, and close to spread and pronounced. Red Oak stains well for an excellent finish.

### MAPLE

Maple is strong and hard with a uniform color, texture, and grain. It sometimes features areas with dark streaks and birds-eye or worm track patterns. If left clear, maple may yellow with age.

### CHERRY

Cherry is characterized by its warm color, smooth texture and straight, fine, and tight grain. Cherry may contain some sapwood and/or pin knots and will darken over time.

### ASH

Ash ranges in color from brown to nearly white and may display a dramatic grain pattern. It is popular in woodworking because it is heavy, strong, hard, and stiff.

### WALNUT

Walnut is characterized by its beautiful grain lines running throughout and its dark brown color. Walnut veneers may be laminated for width and contain some sap grain and pin knots.

### KNOTTY ALDER

This softwood is characterized by its warm yellow to reddish brown color, even texture, straight grain and tight knots throughout.

## PREFINISHING

Save time and job site labor costs by having us prefinish your Captiva Doors. Our state-of-the-art prefinishing line allows us to offer a superior primed, clear coat, stain or Sherwin Williams paint on all our doors.

### 4 MIL DOUBLE PRIME

Let us save you a step. Our 4 mil two-step prime offers a superior base coat for doors that will be painted.

### 4 MIL CLEAR COAT

Our durable 4 mil clear coat offers UV protection and saves time on the job site. (Depending on the application, exposure and overhang, additional coats of finish will be required).
